[Arden Dams - Anchor Design](#)

## **Schedule**

Project Start-up Wednesday, December 4th, 2024

The remaining items shall be as identified in the posted RFP and Addendum #1

## **Answers to Questions**

1. Any existing dam drawings have been uploaded to the above link.
2. Any environmental or geological conditions have been uploaded to the above link.
3. The level of corrosion protection is to be determined by the consultant for permanent anchors given the on-site conditions.
4. Installation is expected to occur in such a way that it minimizes any environmental impacts.
5. There are no other stakeholders that need to be considered at this time.
6. Past rock anchor projects at QC dams include: 2016 Colebrook Dam stabilization project in Colebrook, Ontario and QC is currently undertaking a rock anchor installation at the Bellrock Dam in Bellrock, Ontario. These sites may have different geologic conditions, and site-specific information is to be considered for the Arden Dams project.
7. Please include for a site visit to verify the existing drawings and to ensure that the suggested anchor locations are accurate.
