

School Announcements

Topic: Spring Water Safety (for use during spring thaw). Below are 5 announcements, one announcement for each day of the school week during spring thaw.

1. **A springtime safety reminder from Quinte Conservation...**Rivers, creeks and streams in the Quinte Region are swollen with spring runoff. Currents are strong and fast-flowing waters are dangerously cold. Ice on rivers and lakes can be treacherous at this time of year. Stay away from dams, ditches, and culverts. **Stay away from water! Be smart and stay safe!**
2. **Remember, stay away from the water this spring and stay safe! A springtime safety reminder from Quinte Conservation...** Springtime is a bad time to play near the water. The water is cold and dangerous, and the current is strong. Stay off the ice and away from the slippery shoreline. **Be smart and stay safe!**
3. **A springtime safety reminder from Quinte Conservation...** This spring, be smart and stay safe. Don't play near dams, ditches, or culverts. Stream banks are slippery and ice along shores is dangerous too! **Remember, when you go out this spring ...Stay away from water! Be smart and stay safe!**
4. **Stay away from dam structures. A springtime safety reminder from Quinte Conservation.** Never play around dam structures and never swim near one. Waters currents around a dam can trap you with such force that you cannot escape. **Be smart and be safe near fast-flowing waters, ice, and dams.**
5. **A springtime safety reminder from Quinte Conservation.** Stay away from fast cold flowing waters including rivers, creeks, streams, ditches, and culverts. Remember, never play near dams, and never play near ice without adult supervision. **Be Smart and Stay Safe.**
